

MOTO GUZZI BREVA / NORGE GRISO / 1200 SPORT REAR HUGGER

Remove top hex head bolt from swing arm and fit bracket, use washer as spacer between bracket and swing arm, replace original bolt, do not fully tighten. Undo top nut from lower swing arm linkage and fit bracket as shown, replace nut, do not fully tighten. (See photos).

Slide hugger into position and fix to top bracket using two M6 x 16mm socket flange screws with nylon washers. Do not fully tighten. The lower bracket fits to the outside of the hugger using a M6 x 25mm hex head screw with steel penny washer. Fit through hugger and then into flat threaded plate. Fit thick rubber washer between bracket and hugger. Adjust hugger and hold in position whilst full tightening all fixings. For added security fit M6 nyloc nut over protruding screw through threaded plate. Periodically check screws for tightness.

Contents:
